Why a Quality Plus UPVC Door?

- **Fire Retardant:** our UPVC materials comply with the UL94 Flame Class V-0 standards (the standard test requirement by the United Laboratories of USA).
- **Water Proof:** UPVC doors are non-permeable in nature, giving it a waterproof sheen that other conventional doors do not.
- **Termite Free:** UPVC doors do not suffer from termite infestation.
- **Durable:** The composition of UPVC materials makes for a longer economic life as oppose to conventional doors. With its waterproof qualities, non-corrosive nature, termite free property and easy maintenance, UPVC doors make economic sense.
- **Easy Installation Process:** with its lightweight properties, the installation process is made easier.
- **Variety:** UPVC doors come in a wide variety of finished products. To add versatility to our products, we can also customize to specific client request.
- **Green Product:** Made up of 100% recyclable materials, our products meet stringent "green" criteria classifications.
